

September 11 - 2001, "An Internal Job"

(www.gasparpaya.com)

In my personal opinion, 9/11 was clearly an Internal Job. It was the perfect excuse to justify the war in Iraq and Afghanistan, and a complete program of measures that is transforming a little by little the beautiful free American Society in a new afraid and alienate society, that remember me the cold and manipulated societies of the East of Europe, formerly controlled by the old USSR. The American Society is becoming more and more paranoid and frightened about terrorism, as well as all the occidentals societies do, and this will be the perfect atmosphere for a particular group of radical people in the Republican Party in order to get the complete control of the country with a new internal attack.

The attacks of September 11th had also encouraged so many new enemies for America, willing them to think is possible to repeat something like that (specially radical Muslim Terrorist groups), because the weaknesses of our society and our way of life (about what they are really jealous, because Occidental Countries show greater levels of freedom, prosperity and happiness).

I am afraid that the radical side of the former Bush administration, with its henchmen, could be planning a new and much better elaborated attack, that will cover the thousands of mistakes made on their coward attack of September 11th. If that happens, this beautiful country will be amply divided, and the fear, anger and confusion will not let the people think clearly, by themselves. I am afraid also that a persecution of conspiracy supporters, and of people that opposites to the Government, could start as it was happened with the Communist Purge of Sen. Joe McCarthy in the 50's.

It is so easy to manipulate people, societies in general. It is only necessary very impressive images on TV, some killed humans and some controlled demolitions and explosions, cries and flags. The war would be served!
